

Mindmap 5:

Creating our own module

↳ placing code in Python file in the same directory as your other source code.

↳ file name = module name

Modules

Examples:

Math module:
Turtle module
random module

↳ `pseudo = random`
generators: not random but created algorithmically

→ a file containing python code

???

python.
documentation?

↳ Global module
Documentation

Process:

↳ `|. import`

2. use dot-
